

## MARKET DRAYTON DAIRY SALES

**MONDAY 05 DECEMBER 2022 (10.30AM)**

**155 DAIRY YOUNGTOCK**

**Auctioneer: Jason Brown (07774 816384)**

The Monthly Youngstock sale was combined with the very successful Yareal Dispersal Sale. The saying that numbers draw crowds was certainly true and the ringside was full for this last monthly sale of 2022.

The entry consisted of Holstein Friesian incalf heifers and maidens, LIC bred incalf heifers and maidens.

First through the ring was Mr S. Taylor Lutterworth with his February calving heifers selling at £1,550.

The Holstein Friesian maiden heifers were good farming sorts and these sold to £800 twice for Pedigree heifers from Freeford Farms for heifers sired by Altaamulet and Altaopred. Also at £800 were British Friesian maidens from JS. & HJ. Gleave, Audlem sired by Silerado.

A large entry of LIC bred grazing heifers passed through the ring today. These seem to be losing popularity unless they are very strong, with some producers switching to pro-cross breeding. However, the stronger types peaked at a respectable £750 for February calving heifers, but anything too small, plain were harder work this month. The bulling heifers were similar with most being born Spring '21 and not served these were too old to fit the 2024 block.

**Note: No youngstock sale in January**
