The February entry consisted of all crossbred grazing heifers.

The main consignment came from C. & C. Martin, Exton, who had dispersed their high health status herd last year. This consignment consisted of 34 heifers, mostly sired by the Jersey sire Jolt, were all due March to May to Aberdeen Angus. They had been outwintered but farmed to a high standard. Particular attention had been paid whilst selecting sires to give thought to udders, legs, feet and body depth.

Buyers were impressed with the quality and consistency of the consignment and they were a credit to the owners.

Bidding was enthusiastic from start to finish resulting in a top price of £1,180 for a March calving Jersey cross heifer, 16 making over £1,000 and only three at £750/£780.

This was the best trade seen for crossbred grazing heifers for some time.
